PROFESSIONAL SUMMARY

MERN Developer with 2 years of experience building scalable web applications using **React.js, Node.js, Express.js, and MongoDB**. Skilled in **Redux Toolkit, Recharts.js, Stitch**, **REST APIs, Docker, Git, GitHub, and CI/CD**. Experienced in developing responsive UIs, integrating APIs, containerization, and application deployment with a focus on clean, maintainable code.

SKILLS

Language:	JavaScript, TypeScript, NoSQL
Technologies & Tools:	React.js, Node.js, Express.js, MongoDB, Next.js, Redux Toolkit, Recharts.js, HTML5, CSS3, Strapi, Nextra, Stitch, REST APIs, Postman, Git, GitHub, Docker, CI/CD

WORK EXPERIENCE

Qloron Technology, Hyderabad | (Payroll: Signovate Technologies)

MERN Stack Developer | Feb 2025 - Present

- Contributed to the **Global Fintech Fest @2026 project**, working with senior developers on Strapi CMS for managing backend modules such as Sessions, Events, Speakers, Hackathons, and Live Event Management. Delivered quick, controlled APIs leveraging component-based structures, ensuring maintainability and faster feature rollout.
- Developed and maintained the **Employee Management module** using React.js, managing **1,000+ employee records** across profiles, departments, designations, reporting managers, and employment status.
- Implemented **employee CRUD operations, search, filtering, pagination, and RBAC** across **4 user roles** (Admin, HR, Manager, Employee), improving secure and efficient data management.
- Built **15+ reusable React components**, integrated **REST APIs**, implemented form validation and error handling, and managed application state with **Redux Toolkit**, reducing redundant code by **25%**.
- Resolved critical application bugs and enhanced existing features, improving **code efficiency by 30%** and ensuring reliable performance across evolving business requirements.
- Designed and developed the company's official website with a pixel-perfect, responsive architecture, ensuring smooth UX/UI transitions across all devices. Implemented SEO optimization strategies including structured metadata, robots.txt, sitemap.xml, schema markup, and canonical tags. Achieved higher search engine rankings and improved site indexing by 40%+.
- Developed a robust HR Management System, reducing HR work by 80%, and featuring live location tracking, punch in/out, real-time tracking, asset management, expense management, task management, leave tracker, performance management, learning management, AI Chatbot for support & many more.

PROJECTS

HealSphere – Doctor Appointment Booking System (*Skills: ReactJS, NodeJS, ExpressJS, MongoDB*) GitHub Live

- Engineered a scalable MERN-based doctor appointment platform with JWT authentication, appointment booking, patient/doctor management, Cashfree payments and real-time tracking, enabling secure operations.
- Implemented **JWT authentication, RBAC, REST APIs, MongoDB, Redux Toolkit, and API validation**, building responsive React.js interfaces and optimized Node.js/Express.js APIs for secure, scalable booking workflows.

Social Media App – (Skills: ReactJs, NodeJs, MongoDB, ExpressJs) GitHub Live

- Developed a dynamic **MERN social networking application** with user profiles, post sharing, likes, comments, and personalized feed management.
- Implemented **Clerk authentication, social sign-in, session management**, and responsive interfaces with real-time interactions for a secure and seamless user experience.

EDUCATION

Centurion University of Technology and Management — Completed - 2024
Master of Computer Applications — **CGPA -7.9/10**

Utkal University — Completed – 2022
Bachelor of Science(Computer Science) — **CGPA – 9.1/10**
